R9

Semiautomatic machine with start-stop by foot pedal, automatic clamping/cutting film unit, manual feeding of the product.

R9 140/200

Horizontal stretch wrapping machine for packaging of medium/large products. Can be supplied in semiautomatic or automatic version.

R9/T

Semi-automatic machine for packaging of car tyres, single or up to four stacked - complete with ball transfer tables - start-stop ring by foot pedal, automatic clamping/cutting film unit and manual positioning of the product inside the machine.

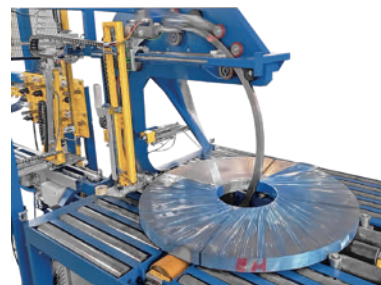

R9/A

Horizontal automatic stretch wrapping machine. Easy to use, simple and robust, suggested for long products.

R9/AC

Horizontal automatic stretch wrapping machine created to send spare parts without using any filling material, just with carton and few grams of stretch film. It can be used with heavy and/or light products. Control panel with PLC and Touch Screen with the possibility to save up to 200 wrapping cycles.

Inwrap

Automatic horizontal wrapping machine for ring shaped products. Can be supplied with centering rotating conveyor.

Ring 40/60

Horizontal automatic stretch wrapping machine for small products.

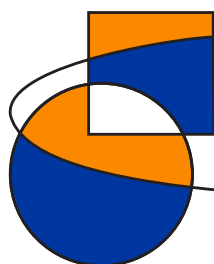

Ring 100/140

Horizontal automatic stretch wrapping machine for medium size products.

Ring 180/210 - 250/320

Horizontal automatic stretch wrapping machine for large and very large products.
